OVERVIEW

Project Overview

A fully-featured 8-page personal portfolio built as a modern React SPA.

1

React SPA with 8 dedicated pages

Home · About · Projects · Dashboard · Certificates · GitHub · Contact · AI Chatbot — all client-side routed with Wouter.

2

Built for recruiters and hiring managers

Showcases skills, projects, certifications, and GitHub activity — everything a technical recruiter needs in one place.

3

Deployed on Replit

Owner: Madiha Mahvish · Hyderabad, India · github.com/Maddy67bh

OVERVIEW

Tech Stack

A modern, component-driven architecture combining React, TypeScript, and Vite with specialized libraries for data visualization.

Frontend

- **React 18 + TypeScript** Component-driven SPA
- **Vite** Ultra-fast dev & prod builds
- **Tailwind CSS v4** Utility-first dark theme
- **Framer Motion** Scroll-reveal animations
- **Wouter** Lightweight client routing

Integrations

- **Apache ECharts** Interactive data charts
- **GitHub REST API** Live repo & profile data
- **React Hook Form + Zod** Contact form validation
- **Google Fonts** Inter + Space Grotesk
- **HTML5 Canvas** Animated particle system

OVERVIEW

Design Philosophy

Apple-inspired glassmorphism with deep space aesthetics — every surface glows, every interaction satisfies.

Dark-First Palette

Deep space backgrounds (#0a0a0f) with indigo-violet-purple accent gradients throughout.

Glassmorphism

`backdrop-blur` surfaces with 8–15% opacity fills and 1px `rgba` borders on every card.

Typography

Space Grotesk for headings + Inter for body text. Precise hierarchy with consistent weight and spacing.

Motion System

Framer Motion drives fade + slide-up entrances, staggered card animations, and scroll-reveal triggers.

● #6366F1 Indigo

● #8B5CF6 Violet

● #A855F7 Purple

● #0A0A0F Base

FEATURES

Animations & Motion

Framer Motion drives every transition — pages feel alive, cards feel intentional.

Page-level transitions

Fade + slide-up on every route mount via `AnimatePresence`

Staggered card entrances

`whileInView` + `staggerChildren` delays on project and certificate grids

Animated skill bars

Width animates from 0 to target % on viewport entry with spring physics

Counter animations

Stats on Home page count up from zero using `useEffect` interval

Canvas particle system

Custom HTML5 Canvas draws floating particles with connection lines on the hero

Smart navbar

Hides on scroll-down, reveals on scroll-up with glass blur effect

ROADMAP

- What's Next

FEATURES

Responsive Design

Fluid layouts built with Tailwind CSS responsive prefixes — flawless across all screen sizes.

1920px – Desktop

3-column project grid · Full navbar · Large hero

1280px – Laptop

2-column grid · Full horizontal nav

768px – Tablet

2-col grid · Full nav

375px – Mobile

1-col · Hamburger

Navigation

Hamburger menu on mobile breakpoints

Charts

ECharts resize fluidly without horizontal scroll

Touch Targets

All tappable elements meet 44px minimum size

ROADMAP

- What's Next

FEATURES

Performance & Accessibility

Optimized for speed and built to be usable by everyone — WCAG AA compliant.

Performance

- **Vite production build**
Tree-shaking · code splitting · minification
- **Route-level lazy loading**
React .lazy + Suspense on all 8 page routes
- **Optimized assets**
CSS minified · JS bundled · fast initial load

Accessibility

- **Semantic HTML5**
nav · main · section · article · aside throughout
- **ARIA labels**
All interactive elements labeled for screen readers
- **WCAG AA color contrast**
All text over glassmorphism surfaces verified · keyboard-navigable with focus rings

FEATURES

SEO & Discoverability

Structured for search engines — rich link previews on LinkedIn, Twitter, and Google.

Meta Tags

```
<title>Madiha Mahvish — AI Portfolio</title>
<meta name="description" ... />
<meta property="og:title" ... />
<meta property="og:image" ... />
<meta name="twitter:card" ... />
```

SEO Checklist

- Unique title + meta description per page
- Open Graph tags for LinkedIn & Facebook
- Twitter Card meta tags
- JSON-LD structured data (personal profile)
- robots.txt + sitemap.xml included
- Canonical URL configuration
- Alt text on all images

ROADMAP

What's Next

The portfolio is live — here's what's planned for the next iteration.

- Live deployment via Replit — shareable public URL for LinkedIn & resume
- Connect contact form to Resend or EmailJS for real email delivery
- Add a blog / articles section powered by Markdown files
- Expand AI chatbot with LLM backend for open-ended Q&A
- Integrate real visitor analytics via Plausible
